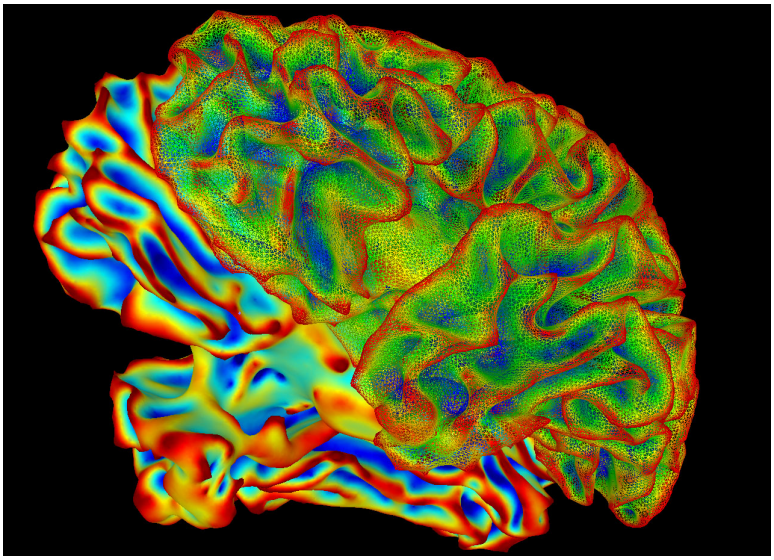
# International Neuroethics Society

www.neuroethicssociety.org

Our mission is to promote the development and responsible application of neuroscience through research, education, outreach and public engagement for the benefit of all nations, ethnicities and cultures.



Our goal is to establish a venue to examine and discuss the implications of neuroscience in its expanding role beyond the research lab and clinic – in classrooms, courtrooms, offices and homes around the world.

Neuroethics thinks about

Safety of neurotechnologies
Brain privacy/lie detection
Effects of interventions and devices
Neural basis of morality
Enhancement and
Legal uses

Who are we?
An interdisciplinary group of scholars, scientists, clinicians, philosophers, CEOs, lawyers and judges who care about the social, legal, ethical, and policy implications of advances in neuroscience.

WHAT WE DO

- ANNUAL MEETINGS
