

It's Time for Community-Based Participatory Research in Neuroethics

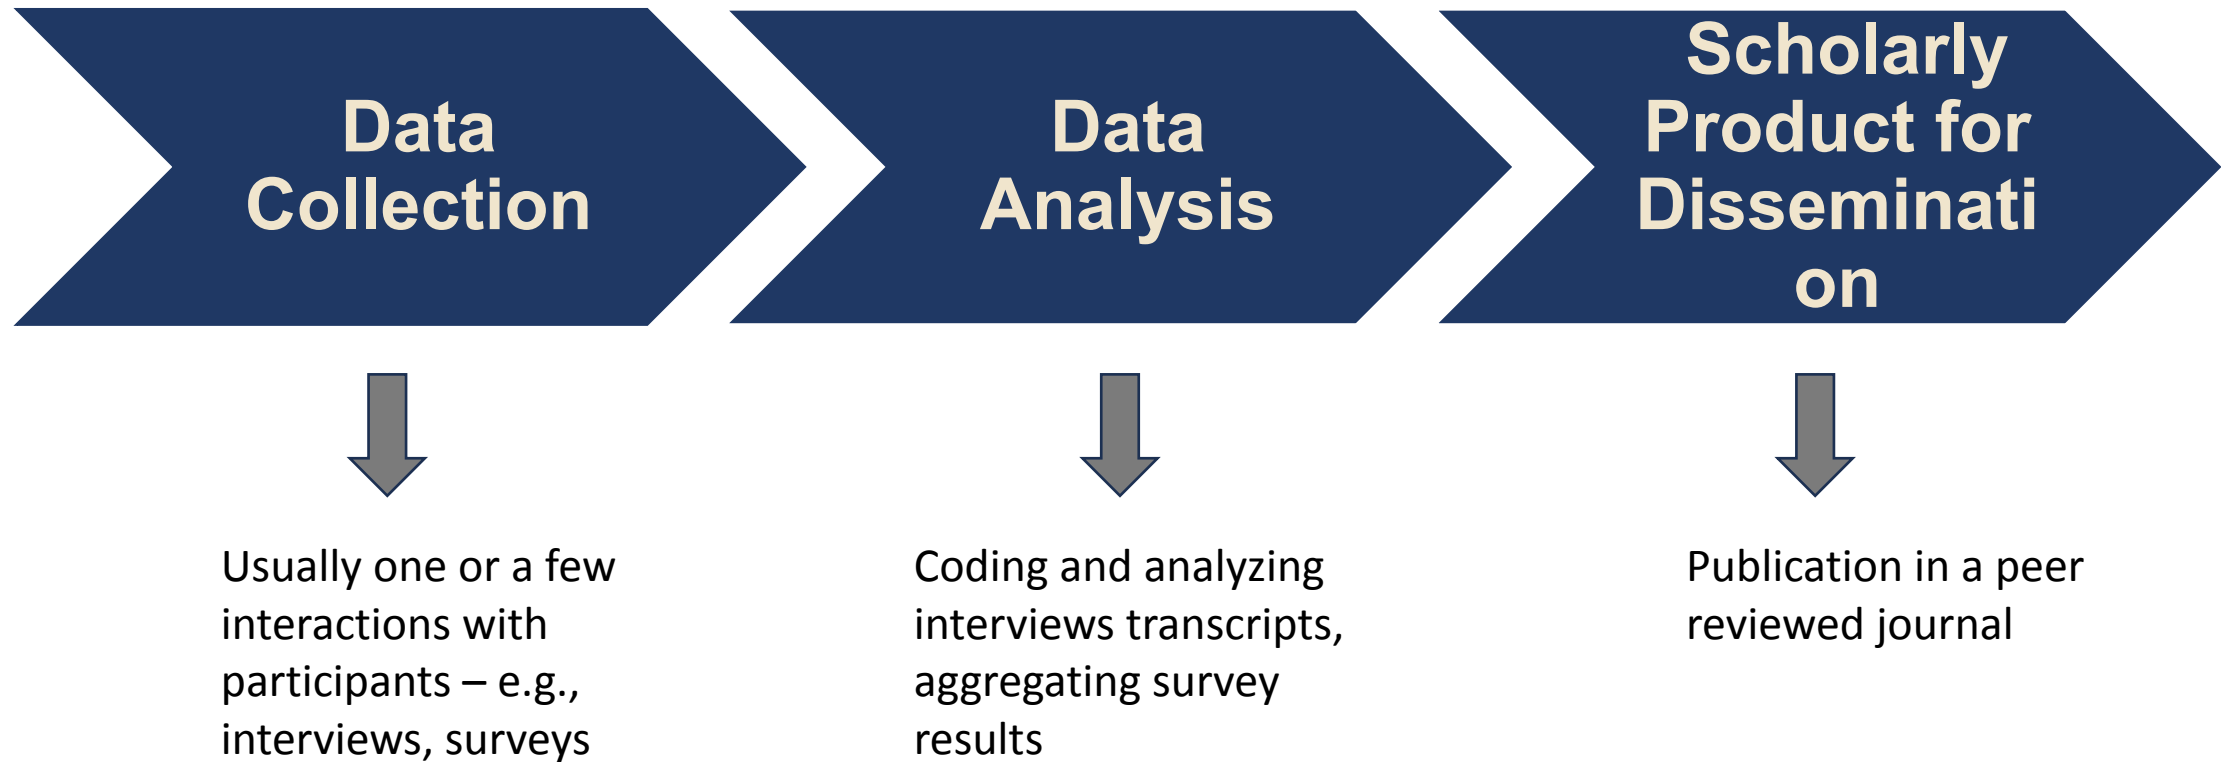

Michelle T. Pham (Michigan State University)

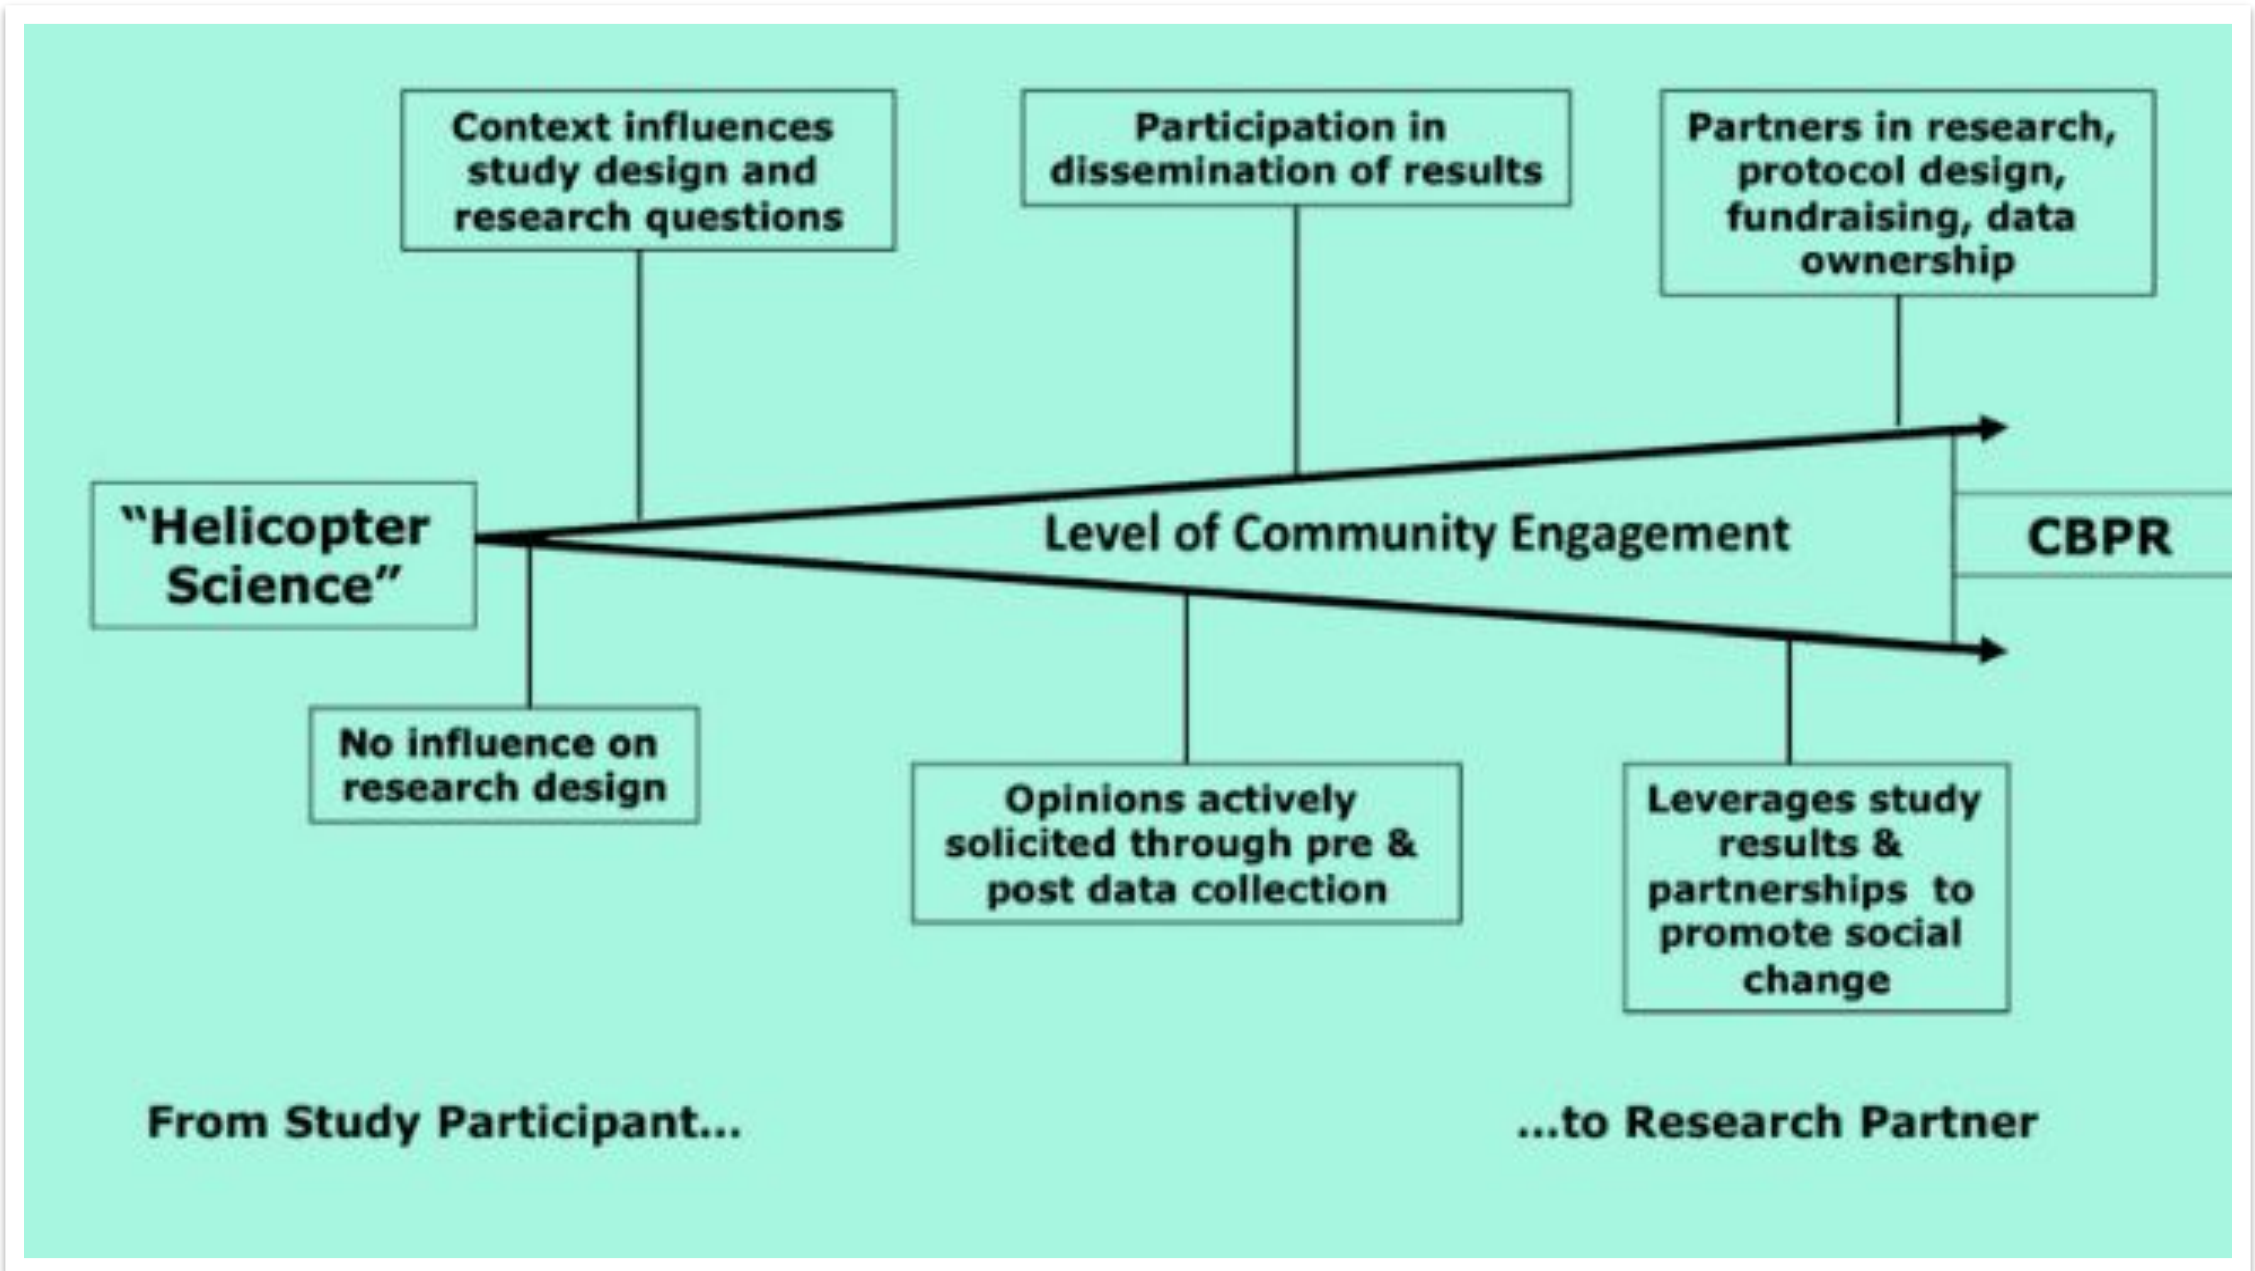

Eran Klein (Oregon Health and Science University)

Sara Goering (University of Washington)

International Neuroethics Society, 2024

Unidirectional Engagement

Community-Based Participatory Research (CBPR)

- Engage communities throughout the research process
- Promote equitable partnerships between communities and academic researchers (i.e., bidirectional, power sharing)
- Collaborative engagement; Cyclical rather than linear relationship
- Co-learning and co-production

Participatory Dialogue

World Café Approach

Set the context

Create hospitable space

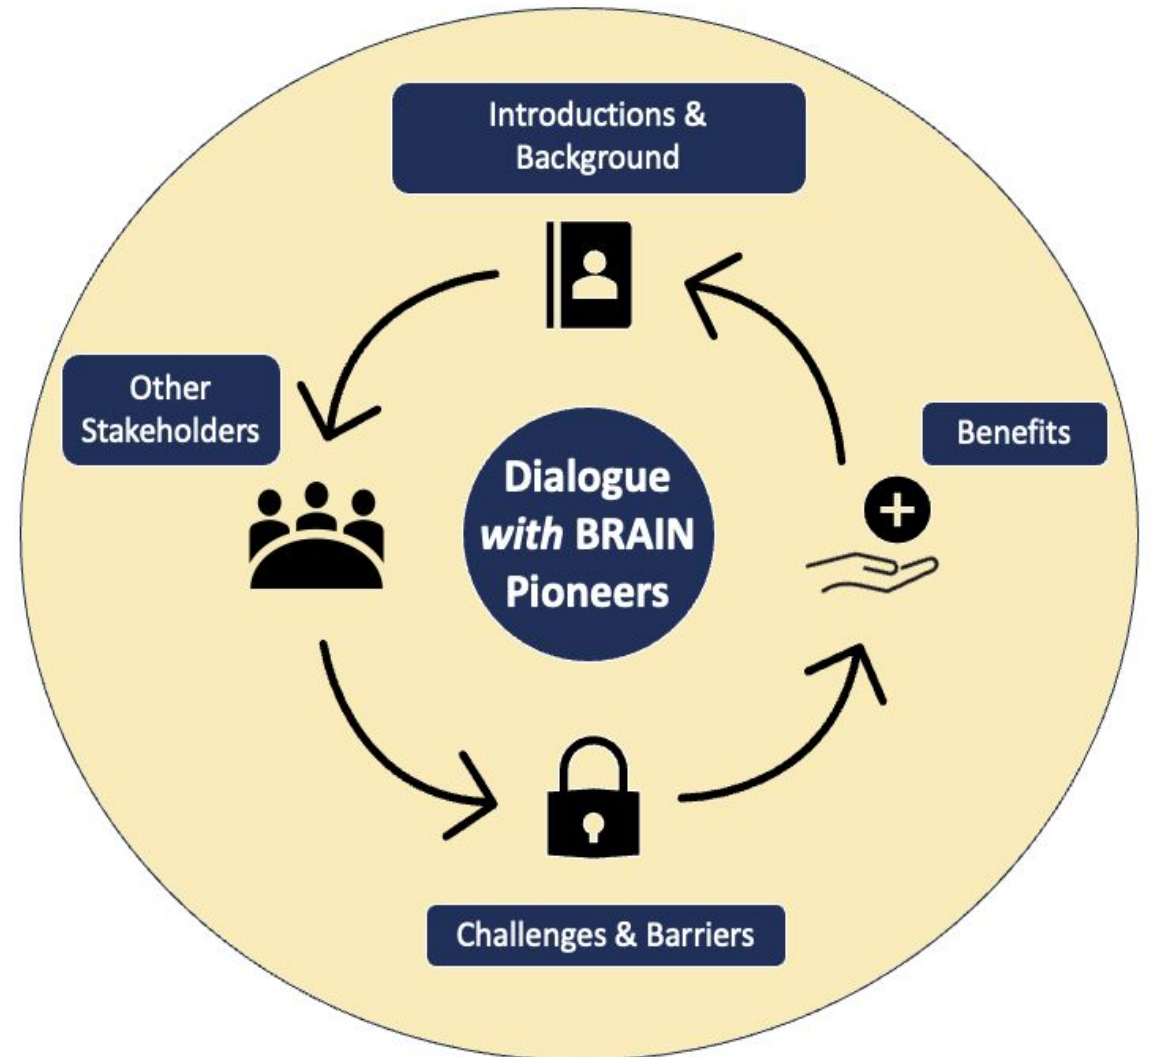

Explore questions that matter

Encourage everyone's contributions

Cross-pollinate and connect diverse perspectives

Listen together for patterns, insights, and deeper questions

Share collective discoveries

Why CBPR?

- Equity and inclusion
- Long-term relationship building
 - Dialogue and trust
 - Iterative feedback
 - Accountability
- Epistemic diversity
- Mutual Benefit

... diversify engagement practices
in neuroethics

Thank you!

Participatory Data Analysis

Phase 1

- Evaluator analyzes data and organizes preliminary findings in the form of data placemats

Phase 2

- Evaluator facilitates a data interpretation meeting in which stakeholders verbalize the story being told in their own words

Phase 3

- Evaluator conducts additional analysis (if needed) and produces a final deliverable
